

**Molytech Products Private Limited**

## **Assembly & Lubricating Paste - MT-1012**

**Molytech Products Private Limited** presents **MT-1012**, a high-quality white assembly and lubricating paste formulated with semisynthetic base oil, lithium soap thickener, and solid lubricants. This paste ensures smooth assembly, reliable lubrication, and excellent resistance to both hot and cold water in demanding industrial and maintenance operations.

### **Applications:**

- Assembly of machine parts, bearings, and couplings
- Suitable for sliding surfaces and threaded connections
- General-purpose industrial and maintenance lubrication

### **Features & Benefits:**

- White assembly pastes for clean application
- Resistant to hot and cold water
- Provides effective lubrication and wear protection
- Prevents seizure and eases dismantling
- Ensures long-term performance under varying conditions

Choose **MT-1012 Assembly & Lubricating Paste** from **Molytech Products Private Limited** for superior assembly lubrication, extended equipment life, and reduced maintenance downtime.
