Anti seize Paste – MT-1015

Molytech Products Private Limited presents **MT-1015**, a high-performance molybdenum disulfide-based antiseize paste engineered for superior protection against seizure, galling, and corrosion. Formulated with mineral oil and MoS₂ powder, it ensures reliable lubrication and easy dismantling of threaded parts and assemblies even under extreme conditions.

Applications:

- Threaded parts, bolts, and nuts
- Assemblies exposed to high loads and corrosive environments
- Automotive, industrial, and maintenance applications

Features & Benefits:

- Excellent resistance to acids, alkalies, and water
- Provides long-term protection against wear, rust, and corrosion
- Facilitates smooth dismantling after prolonged service
- Reduces friction, galling, and fretting of mating parts
- Enhances equipment reliability and reduces downtime

Choose **MT-1015 Antiseize Paste** from **Molytech Products Private Limited** for dependable protection, easy maintenance, and extended service life of critical components.
