Electrical Contact Cleaner (Offline) – MT-1022

Molytech Products Private Limited presents **MT-1022 Electrical Contact Cleaner (Offline)**, a fast-acting solvent-based aerosol designed to clean electrical and electronic contacts effectively. With very low viscosity and quick evaporation, it removes dirt, dust, oil, and oxidation residues without leaving behind any deposits, ensuring clean and reliable electrical performance.

Applications:

Specially developed for offline cleaning of switches, connectors, relays, circuit boards, and other sensitive electrical/electronic components where a residue-free finish is essential.

Features & Benefits:

- Spray formulation for easy and targeted application
- Cleans electrical contacts effectively by removing dirt, oil, and oxidation
- Leaves no residue after evaporation
- Ensures reliable conductivity and prevents malfunction
- Designed for **offline cleaning** of electrical/electronic parts
- Improves equipment reliability and service life

Choose **MT-1022 Electrical Contact Cleaner (Offline)** from Molytech Products Private Limited for safe, efficient, and residue-free cleaning of critical electrical components.
