

Molytech Products Private Limited

Electronic Component & PCB Cleaner – MT-1023

Molytech Products Private Limited presents **MT-1023 Electronic Component & PCB Cleaner**, a high-purity solvent-based aerosol cleaner specially designed for delicate electronic components and printed circuit boards (PCBs). Its fast-evaporating and residue-free formula ensures effective cleaning without damaging sensitive parts, making it ideal for precision electronic maintenance.

Applications:

Ideal for cleaning PCBs, electronic components, relays, sensors, connectors, and other delicate parts in consumer electronics, industrial electronics, telecommunications, and instrumentation.

Features & Benefits:

- Fast-evaporating formula for quick and efficient cleaning
- Leaves **no residue**, ensuring reliable performance of electronics
- Safe for use on most sensitive electronic components
- Effectively removes flux residues, dust, and light oils/contaminants
- Environmentally safe formulation
- Helps maintain conductivity and prolongs equipment life

Choose **MT-1023 Electronic Component & PCB Cleaner** from Molytech Products Private Limited for safe, residue-free, and environment-friendly cleaning of precision electronic systems.
