Autoconer Spray – MT-1024

Molytech Products Private Limited presents **MT-1024 Autoconer Spray**, a specialized synthetic oil-based aerosol formulated for knotters and splicers in autoconer machines. Designed for the textile industry, this spray provides optimum lubrication while offering effective cleaning action, ensuring reliable machine performance without leaving stains or residues.

Applications:

Specially developed for autoconer machines in textile plants, providing lubrication and cleaning of knotters and splicers to ensure smooth operation, reduced downtime, and high-quality yarn production.

Features & Benefits:

- Provides optimum lubrication for knotters and splicers
- Non-staining formulation — safe for textiles and machine surfaces
- Cleans and lubricates simultaneously for improved efficiency
- Enhances machine performance and reduces wear
- Helps maintain yarn quality and reduces machine stoppages
- Easy-to-use aerosol spray for precision application

Choose **MT-1024 Autoconer Spray** from Molytech Products Private Limited for clean, effective, and reliable lubrication in textile autoconer machinery.
