Silicon Mould Release Spray – MT-1041

Molytech Products Private Limited presents **MT-1041 Silicon Mould Release Spray**, a high-quality silicone oil-based aerosol designed to provide excellent release performance in plastic moulding and related applications. With its non-staining and thermally stable properties, this spray acts as a reliable release agent, reducing downtime and ensuring superior surface finish of moulded parts.

Applications:

Specially developed for plastic moulding operations, injection moulding, die-casting, rubber moulding, and as a release agent in various industrial applications.

Features & Benefits:

- Silicone-based formula ensures superior mould release
- Withstands high operating temperatures (>240°C)
- Prevents sticking, reduces rejects, and improves productivity
- Provides clean, non-staining release for high-quality surface finish
- Multipurpose release agent suitable for diverse industrial uses
- Easy-to-use aerosol spray for uniform application

Choose **MT-1041 Silicon Mould Release Spray** from Molytech Products Private Limited for efficient, clean, and reliable mould release performance across a wide range of industrial applications.
