Non-Silicon Mould Release Spray – MT-1043

Molytech Products Private Limited presents MT-1043 Non-Silicon Mould Release Spray, a high-performance synthetic oil-based aerosol specially formulated for industries requiring clean and residue-free mould release. With its silicon-free composition, it is ideal for applications where post-release painting, printing, or surface finishing is required, ensuring superior product quality and process efficiency.

Applications:

Specially designed for plastic, rubber, and composite moulding processes where subsequent painting, printing, plating, or coating operations are to be carried out.

Features & Benefits:

- **Silicon-free formulation** prevents interference with painting, printing, or coating processes
- **Excellent release properties** for easy and smooth separation of moulded parts
- **Residue-free spray** ensures clean moulds and superior surface finish
- **High flash point** for enhanced safety in high-temperature operations
- **Protects mould surfaces** against wear, friction, and corrosion
- **Convenient aerosol application** for precise, uniform coverage

Choose **MT-1043 Non-Silicon Mould Release Spray** from Molytech Products Private Limited for a clean, efficient, and versatile mould release solution—perfect for industries demanding high-quality finishing and performance.
