

Molytech Products Private Limited

PTFE Spray – MT-1048

Molytech Products Private Limited presents MT-1048 PTFE Spray, a high-performance synthetic oil and PTFE-based aerosol designed to deliver a durable, dry-film lubricant coating. This advanced formulation provides excellent anti-friction, anti-wear, and release properties, ensuring long-lasting protection and smooth operation across a wide range of industrial applications

Applications:

Specially developed as a PTFE-bonded coating spray to reduce friction, wear, and sticking in machinery components, sliding surfaces, and equipment where clean, long-term lubrication and release properties are required.

Features & Benefits:

- **PTFE-reinforced dry film coating** ensures long-lasting lubrication
- **Excellent anti-friction and wear resistance** for extended equipment life
- **Provides effective release properties** to prevent sticking and material build-up
- **Residue-free, clean lubrication** suitable for precision components
- **High flash point** enhances safety during application
- **Easy-to-use aerosol spray** ensures uniform coating and precise application

Choose **MT-1048 PTFE Spray** from Molytech Products Private Limited for reliable dry-film lubrication, superior release performance, and long-term protection in industrial and maintenance applications.
