Corrosion Protection Coating – MT-1070

Molytech Products Private Limited presents **MT-1070**, a high-performance, non-chlorinated corrosion protection coating designed to safeguard metal surfaces against rust and oxidation. It forms a wet protective film that ensures long-lasting defense in harsh and hostile environments, making it ideal for industrial maintenance applications.

Applications:

- Protection of tools, gauges, and measuring instruments
- Coating for dies, moulds, and machine parts
- Ideal for equipment exposed to moisture, humidity, and corrosive conditions

Features & Benefits:

- Forms a wet protective film on metal surfaces
- Prevents rust and corrosion in hostile environments
- Provides long-term preservation for idle machinery and tools
- Easy to apply, non-chlorinated formulation
- Reduces maintenance costs and extends component life

Choose **MT-1070 Corrosion Protection Coating** from **Molytech Products Private Limited** for reliable metal protection, enhanced equipment durability, and reduced downtime.
