

Molytech Products Private Limited

High Temperature Chain Oil Spray – MT-1078

Molytech Products Private Limited presents MT-1078 High Temperature Chain Oil Spray, a premium synthetic oil-based aerosol specially designed for lubrication of industrial chains operating under elevated temperatures. With excellent adhesive properties, it ensures long-lasting lubrication, reduces wear, and enhances the service life of chains and related components even in demanding working conditions.

Applications:

Specially developed for lubrication of industrial chains, Bowden cables, and sliding tracks exposed to high temperatures and heavy loads.

Features & Benefits:

- **Effective adhesive chain lubricant** for high-temperature environments
- **Provides long-lasting lubrication** reducing wear and friction
- **Excellent thermal stability** ensures consistent performance at elevated temperatures
- **Protects against rust and corrosion** under harsh operating conditions
- **Extends service life** of chains, cables, and sliding components
- **Easy aerosol spray application** for precise, uniform coverage

Choose MT-1078 High Temperature Chain Oil Spray from Molytech Products Private Limited for superior chain lubrication and protection, ensuring reliable performance in high-temperature industrial operations.
