Insulating Varnish Spray – MT-1080

Molytech Products Private Limited presents **MT-1080**, a tough, red-colored insulating varnish spray designed to provide reliable electrical insulation and protection. With excellent dielectric strength, it forms a durable, flexible coating that safeguards exposed wires, windings, and electrical components from moisture, dust, and mechanical damage.

Applications:

- Electrical and electronic components
- Exposed wires, terminals, and connectors
- Motor windings and coils
- Printed circuit boards and insulation protection

Features & Benefits:

- Fast-drying varnish for quick application
- Provides strong dielectric insulation up to 2 kV
- Tough, flexible, and long-lasting protective coating
- Shields components from moisture, dust, and contaminants
- Enhances electrical safety and extends equipment life

Choose **MT-1080 Insulating Varnish Spray** from **Molytech Products Private Limited** for dependable electrical insulation, improved safety, and long-term component protection.
