Molytech Products Private Limited

Moisture & Rust Guard – MT-1081

Molytech Products Private Limited presents **MT-1081**, a non-chlorinated, green-coloured protective aerosol specially designed to provide temporary indoor rust and corrosion protection. It forms an almost dry, thin protective film that effectively safeguards machined components, dies, moulds, and precision tools against moisture and oxidation.

Applications:

- Machined components and precision parts
- Tools, gauges, dies, and moulds
- Temporary indoor corrosion protection for idle equipment
- Storage of finished components prior to assembly or dispatch

Features & Benefits:

- Green-coloured, almost dry thin film for clean protection
- Provides effective temporary rust and corrosion resistance
- Ideal for indoor storage and short-term preservation
- Non-chlorinated, safe-to-use protective coating
- Ensures quick removal and easy re-use of components

Choose **MT-1081 Moisture & Rust Guard** from **Molytech Products Private Limited** for efficient short-term corrosion protection, reduced maintenance, and longer service life of precision components.
