Wire Rope Spray – MT-1087

Molytech Products Private Limited presents **MT-1087**, a high-performance synthetic oil-based aerosol designed specifically for the lubrication and protection of industrial wire ropes operating under extreme conditions. With excellent penetration and high thermal stability, it ensures smooth operation, reduced wear, and extended service life of wire ropes and related components.

Applications:

- Industrial wire ropes under heavy loads and high temperatures
- Chains, Bowden cables, and sliding tracks
- Marine, mining, crane, and material handling equipment
- Rope drives exposed to harsh working environments

Features & Benefits:

- Specially formulated wire rope lubricant
- Excellent penetration for internal strand protection
- Withstands high loads and temperatures above 210°C
- Reduces wear, friction, and corrosion
- Extends rope and chain service life while lowering maintenance costs

Choose **MT-1087 Wire Rope Spray** from **Molytech Products Private Limited** for reliable wire rope lubrication, superior protection, and high-performance operation in demanding industries.
