Anti Seize Paste – MT-1100MF

Molytech Products Private Limited presents **MT-1100MF Anti Seize Paste**, a high-performance mineral oil-based compound enhanced with EP additives and solid lubricants. Specially formulated for extreme temperature applications, this non-staining paste offers superior protection against fretting corrosion, wear, and seizure, ensuring reliable operation and easy disassembly of critical components.

Applications:

Ideal for threaded fasteners, joints, couplings, flanges, and components exposed to high temperatures, vibrations, or corrosive environments. Suitable for industries including automotive, steel, power, and heavy machinery.

Features & Benefits:

- Withstands extreme temperatures up to 1200°C
- Non-staining formula prevents contamination and surface marks
- Protects against fretting corrosion, galling, and seizure
- Ensures smooth assembly and disassembly of parts
- Long-lasting lubrication for heavy-duty and industrial applications

Choose **MT-1100MF Anti Seize Paste** from Molytech Products Private Limited for dependable protection and maintenance efficiency in the toughest operating conditions.
