

**Molytech Products Private Limited**

## **Multipurpose Grease – MT-1102**

**Molytech Products Private Limited** introduces **MT-1102**, a premium **silicone oil-based inorganic thickened grease** designed for specialized industrial applications requiring exceptional temperature stability, sealing capability, and material compatibility. Its superior adhesion and tackiness ensure long-lasting lubrication even in harsh environments.

### **Applications:**

Ideal for vacuum pumps, shut-off valves, seals, and other equipment requiring non-reactive, long-life lubrication. Specially formulated to be safe on rubber and elastomers.

### **Features & Benefits:**

- Outstanding high and low temperature performance
- Excellent adhesion and sealing properties
- Rubber and elastomer safe formulation
- Water, steam, and chemical resistant
- Long service life in demanding conditions

**MT-1102** – the **trusted choice** for precision components and critical sealing applications.
