## **High Temperature Chain Oil – MT-CL220**

Molytech Products Private Limited presents **MT-CL220 High Temperature Chain Oil**, a premium synthetic oil enhanced with advanced additives for reliable lubrication and protection of chains operating under extreme thermal conditions. Designed with superior oxidation stability and low volatility, it ensures cleaner operation, reduced wear, and extended service life of chains across a wide range of industries.

### **Applications:**

Ideal for conveyor chains, drive chains, stenter chains, oven chains, and other chain systems exposed to elevated temperatures. Suitable for use in textile, automotive, food processing (non-toxic variants), and general industrial applications requiring dependable chain lubrication.

### **Features & Benefits:**

- High-temperature resistance up to 250°C
- Low volatility for reduced oil consumption and cleaner chains
- Superior oxidation stability minimizes deposits and varnish formation
- Excellent wear and corrosion protection for extended chain life
- Ensures smooth, reliable chain operation under heavy loads and thermal stress
- Suitable for all types of industrial chains working in demanding environments

Choose **MT-CL220 High Temperature Chain Oil** from Molytech Products Private Limited for long-lasting protection, reduced downtime, and optimum performance in high-temperature chain applications.
