

Molytech Products Private Limited

Centralized Lubrication Grease – MT-LiEP0/00/000

Molytech Products Private Limited offers **MT-LiEP0/00/000**, a high-quality **mineral oil-based lithium soap grease** engineered for centralized lubrication systems. Designed for smooth pumpability, excellent water resistance, and reliable high load performance, this grease ensures consistent lubrication in both industrial and mobile applications.

Applications:

Perfect for centralized lubrication systems in industrial machinery, automotive fleets, and heavy-duty equipment. Suitable for use in applications where smooth flow and high load protection are essential.

Features & Benefits:

- Excellent pumpability for centralized systems
- High load carrying capacity
- Superior water resistance for extended bearing life
- Reliable performance across a wide temperature range
- Reduces wear and extends component service life

MT-LiEP0/00/000 – the **universal choice** for efficient and long-lasting centralized lubrication.
