High Temperature Grease – MT-MiPU2

Molytech Products Private Limited presents **MT-MiPU2**, a premium **mineral oil-based polyurea thickened grease** formulated for high temperature and heavy load applications. This grease offers outstanding thermal stability and extended service life, making it ideal for demanding industrial environments.

Applications:

Engineered for high temperature bearings, electric motor bearings, kiln fans, and other heavy-duty equipment operating under severe thermal and mechanical stress.

Features & Benefits:

- Exceptional high temperature and load resistance
- Excellent thermal and oxidative stability
- Long service life, reducing relubrication frequency
- Good adhesion and mechanical stability
- Protects against wear and corrosion

MT-MiPU2 – delivering **long-lasting protection** for high-temperature, high-load applications.
