

Molytech Products Private Limited

Synthetic Gear Oils – MT-PG 4300 series

Molytech Products Private Limited presents the **MT-PG 4300 Series**, a range of high-performance synthetic **polyalkylene glycol (PAG) based gear oils** engineered for long-term lubrication and superior protection. With excellent oxidation stability and a sludge-free formulation, these oils provide outstanding reliability for demanding gear systems across industrial applications.

Applications:

- Enclosed industrial gearboxes
- Worm and spur gear drives
- High-load, high-temperature gear applications
- Long service life lubrication in manufacturing, cement, and processing industries

Features & Benefits:

- Synthetic **PAG-based** formulation for superior performance
- Sludge-free operation with excellent cleanliness
- Outstanding oxidation and thermal stability
- Provides long-term lubrication under severe operating conditions
- Extends gear life and reduces downtime & maintenance costs

Choose **MT-PG 4300 Series Synthetic Gear Oils** from **Molytech Products Private Limited** for reliable, long-lasting gear protection and efficiency in the toughest industrial environments.
