Rust Conversion Coating – MT-RC100

Molytech Products Private Limited presents **MT-RC100**, a water-based rust converter and preventative coating designed for effective rust treatment and long-term protection. This ready-to-use formulation chemically converts rust into a stable, protective coating while preventing further corrosion, making it ideal for industrial and structural applications.

Applications:

- Sheet metal fabrication
- Fabricated structures in chemical plants
- Heat exchangers and cooling tower structures
- Industrial equipment exposed to moisture and corrosive environments

Features & Benefits:

- Ready-to-use rust converter coating
- Chemically stabilizes and converts rust into a protective layer
- Provides long-lasting corrosion resistance
- Water-based, safe to use, and environmentally friendly
- Reduces downtime and extends the life of metal components

Choose **MT-RC100 Rust Conversion Coating** from **Molytech Products Private Limited** for efficient rust treatment, easy application, and durable protection in harsh industrial conditions.
