High Temperature Grease – MT-SYN PU2

Molytech Products Private Limited offers **MT-SYN PU2**, a premium **synthetic oil-based, polyurea-thickened grease** specially formulated for extreme temperature and long-life lubrication. Designed for high-performance applications, it delivers exceptional protection, even under severe thermal and mechanical stress.

Applications:

Ideal for high temperature bearings in **electric motors, fans, exhausters, drying tunnels, oven wagons, conveyors, pumps, and chains** where extended lubrication intervals are essential.

Features & Benefits:

- Outstanding high temperature performance
- Excellent oxidation and thermal stability
- Extended service life, reducing downtime
- Superior mechanical stability and adhesion
- Protects against wear and corrosion in harsh environments

MT-SYN PU2 – engineered for **reliable lubrication in extreme temperature operations**.
