Anti Spatter Release Agent – MTL-502AS

Molytech Products Private Limited presents **MTL-502AS Anti Spatter Release Agent**, a high-performance, water-based synthetic release agent designed to prevent welding spatter from adhering to metal surfaces. Formulated to be silicon-free and economical, it provides clean, reliable protection for welding operations and improves surface finish while reducing post-weld cleaning.

Applications:

Ideal for welding processes to protect workpieces, welding nozzles, and fixtures from spatter adhesion. Suitable for use in fabrication, automotive, heavy machinery, and general welding applications.

Features & Benefits:

- Synthetic release agent with excellent anti-spatter performance
- Water-based, safe, and environmentally responsible
- Silicon-free formulation ensures paint ability and surface treatment compatibility
- Economical to use — can be diluted with water in a **1:4 ratio**
- Reduces cleaning time and improves weld surface finish
- Extends nozzle and fixture life in welding applications

Choose **MTL-502AS Anti Spatter Release Agent** from Molytech Products Private Limited for cost-effective, clean, and reliable protection in welding and fabrication operations.
